

£6 million cardiology building and refurbishment programme completed.

The Wellington Hospital's £6 million refurbishment and expansion of the cardiology department in the Wellington North building, is now complete, on time and on budget. The department now has three large catheter laboratories equipped with the most up to date technology available anywhere in the UK independent hospital sector.

The hospital's 30 plus cardiologists and specialist medical teams carry out the all of the latest and complex treatments including radio frequency ablation to cure arrhythmia as well as angiography, the insertion of pacemakers and the full range of other tests and treatments.

For more information of the services we provide for private patients, please call The Wellington Heartline on 020 7583 5000.
